To Whom It May Concern:

Steve Behrends at Keystone Design / Buid, Inc. recently completed an addition on our home. He added a garage and finished the original garage space into a multi-purpose or recreation room.

Steve was able to take our idea and expand on it to create a useful garage and very livable room and even was able to make the addition look as though it was part of the original design. Throughout the project, Steve was very attentive to detail and thought ahead so very few problems were encountered and those were quickly solved. His ideas consistently improved the final result. He was always available when we had questions.

The addition has turned out better than we expected and we can sincerely recommend Steve. He was a pleasure to work with and his work can only be described as excellent.

Sincerely,

John R. Mayher
